ABOUT ME

I am a young programmer seeking new challenges and opportunities for growth. My main area of expertise is C# (Blazor, ASP.NET, WPF, WinForms, Unity), but I have also completed projects using C++, Python, PHP, and JavaScript. I have just finished my engineering degree and plan to begin my master's studies. I'm looking for a job that allows me to develop professionally while continuing my education, so I can expand both my academic and practical knowledge.

WORK EXPERIENCE

10.2021 – 02.2025 **BIALIC POMAGALSKI**
- Part-time work: designing and developing applications to assist with measurements (conversion and processing of data from the Leica 3D Disto measuring device to the Compass stair design software), 3D AR visualizations, and an enterprise management system.
